# CRAZYHOUSE (ZH)

WHAT IS CRAZYHOUSE (ZH)

Crazyhouse (also known as **drop chess**, **mad chess**, **reinforcement chess**, **turnabout chess** and **schizo-chess**) is a chess variant similar to bughouse chess, but with only two players. It effectively incorporates a rule from the game shogi, in which a player can introduce a captured piece back to the chessboard as their own.

RULES OF CRAZYHOUSE (ZH)

All the rules and conventions of standard chess apply, with the addition of drops, as explained below.

• A captured piece reverses color and goes to the capturing player's reserve, pocket or bank. At any time, instead of making a move with a piece on the board, a player can *drop* a piece from their reserve (a piece in there is considered "held" or "in hand") onto an empty square on the board. For example, a check that would result in checkmate in standard chess can be answered in Crazyhouse, if the defender can play a legal drop that blocks the check.[1]

• Drops resulting in immediate checkmate are permitted. Unlike in shogi, this includes pawn drops.[2]

• Pawns may not be dropped on the players' 1st or 8th *ranks*.[2]

• Pawns that have been promoted and later captured are dropped as pawns.[2]
